## Competitor

204

→ menu 2.

204

menu!

then scroll up  
you can choose  
historical data.  
or scroll down  
until you get  
the latest  
data.

menu 1: We have a default page of card pages shows the top three competitive competitors. If you want to change competitor to other data, which is available in card game, you can click ▶, then there is category a list for you to choose e.g. Product, then it shows top 3 important products

- ④ KPI a, b, c shows - the type of interested KPI by clicking in list
- ⑤ The list of KPI is related to the card.
- ⑥ It is different between component card and Product card
- ⑦ click  if you want to see other KPI instead of the current one
- ⑧ KPI d will only show those data which is not static. Like Sales, difference can be seen when one month passes
- ⑨ data besides the KPI.

\* KPI d is the subcategory of KPI a.  
KPI a,b,c has same list

when you click , it will turn back to the main page

① if I click this it will show all cards. It must define the maximum number of the card that can be display in one screen. and you can choose maximum 3 cards to compare its RP!

this card only show the logo or name. if you choose it, the small card background color change. When you click confirm ~~another~~ area shows if you click back, then it shows the homepage.

This card only show the logo or name. If you choose it, the small card background color change. When you click confirm another area shows if you click back, then it shows the homepage.
